

FTS-400 Floor-to-Stand For Home and Care Centers

The FTS-400 was developed for mobility challenged individuals and those who care for them!

Description

The FTS-400 is a lift & transfer tool that enables quick and safe fall recovery while eliminating manual lifting.

It can raise individuals up to 400 lbs. (181 kg) to a seated or standing position, and allows for easy transfers to and from a wheelchair, bed, commode, exercise equipment or even the floor.

The standing lift function allows users to be safely raised to access a high bed or an overhead cabinet - a step stool without the step!

Can be used independently or with the assistance of a caregiver.
